

## Evenex.Forté

### Care & Maintenance

**EVENEX FORTE IS FORMULATED PRIMARILY FOR DRY-USE AREAS:**

- Use either a soft dry cloth or feather duster to remove surface dust.
- If dust accumulation is heavy, the surface may be lightly vacuumed.
- Protect from direct, bright or reflected sunlight and heat.

**IF FURTHER CLEANING IS REQUIRED:**

- Evenex Forté can be washed using non-abrasive surfactant-based products such as those commonly used in the home.
- Before cleaning with industrial products, we recommend performing a stain-resistance test in line with current technical regulations on an off-cut.
- Dry with a soft cloth.
