

Evenex.Forté

Material Handling Guide

Evenex Forté is a continuous pressed laminate CPL supplied as 0.6mm laminate sheets or E0 MRMDF panels. Suitable for interior joinery and furniture it is recommended for vertical and horizontal use.

- Not recommended for outdoor use.
- Protect from direct, bright or reflected sunlight.
- Do not drag/slide sheets across one another.
- Do not lean against walls for a prolonged period as this will cause bowing.
- Store flat at least 200mm from the floor and keep in strapped pack covered with plastic sheeting and/or a cover sheet and protected from light and humidity until ready to use. Keep the humidity range of the storage area between 40% and 70% (RH).
- Finger or hand marks will show less on mid-toned finishes compared to dark toned finishes.
- Clean with a damp, non-abrasive cloth and warm soapy water. Do not use harsh chemicals.
- If you do want to try a chemical, please perform a stain-resistance test on an off-cut first.
